

# Introducing AppyWay's new TTRO Module

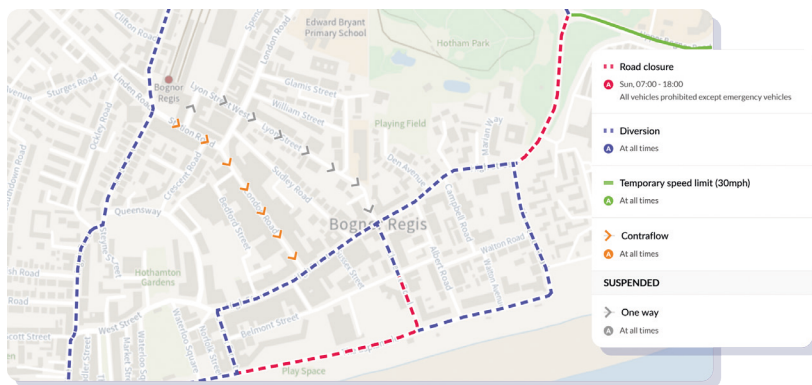

Unified. Efficient. Simple.

Finally, a single platform for all your core traffic orders, including a powerful new TempO (Temporary Orders) Module, designed with and for UK local authorities.

Local authorities, we hear you! We know managing Temporary Traffic Orders can be challenging—complex, time-consuming, and at times frustrating. That's why we built the AppyWay TempO Module, designed to simplify and streamline the process. Seamlessly integrated into our unified Traffic Suite, it makes managing TTROs easier, faster, and more efficient than ever!

## What Makes AppyWay Different?

- **Comprehensive Coverage:** We offer a single platform to manage core traffic order types: static, moving, off-street, permanent, experimental, and now temporary. We're the only provider offering this level of integrated functionality.
- **Customer Co-Created:** It's a solution built in partnership with local authorities that addresses your specific needs and pain points.
- **API Integration:** Integrate the TempO Module with your existing enforcement tools and other systems via our powerful API.
- **DTRO Compliant:** Built to meet the standards of the Digital Traffic Regulation Orders.

### Digital Order Flow & Mapping

Experience a streamlined digital order flow, directly integrated with Mapper. Visualise and manage TTRO orders directly on a map-based interface.

### Visual TTRO Representation

Move beyond text-based descriptions. TTRO information is now displayed visually in Streets and can be hosted via an iFrame on your website, making it accessible and easy to understand for everyone - from enforcement to local residents viewing public consultations.

### Enhanced Public Transparency

Our integrated engagement module enables public consultations, fostering open communication and building trust.

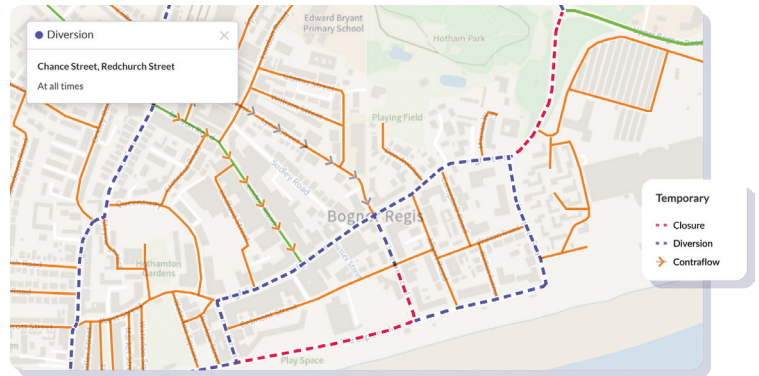

### Core TTRO Functionality

The initial launch supports suspensions, closures, diversion routes, contraflows and temporary restrictions.

# Introducing AppyWay's new TTRO Module

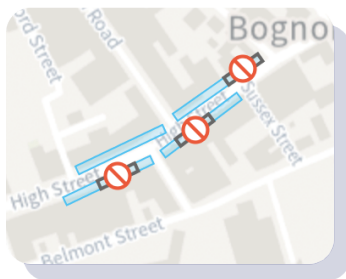

Ditch the disconnected chaos. Embrace unified Traffic Order management.

## Why Choose AppyWay Over the Competition?

Unlike the competition's monopolistic approach and high costs, AppyWay offers:

- ✓ **Competitive Pricing:** A single, transparent price for all core traffic order types, eliminating hidden fees and budget surprises.
- ✓ **Dedicated Customer Support:** Experience superior support with dedicated account managers, ensuring your success.
- ✓ **Integrated Core Functionality:** AppyWay offers a modular approach, allowing you to select the traffic order functionalities essential for your authority - you only invest in what you need.
- ✓ **A user-friendly system:** Same look and feel as all other order types, no comprehensive retraining required.
- ✓ **Single Contract, Tailored to Your Budget:** Simplify procurement with a single contract, designed to fit your financial requirements.
